

NAVY TRAINING SYSTEM PLAN

FOR

ARMAMENT WEAPONS

SUPPORT EQUIPMENT

N88-NTSP-A-50-8604B/A

JANUARY 2004

ARMAMENT WEAPONS SUPPORT EQUIPMENT**EXECUTIVE SUMMARY**

Traditionally, custody and maintenance responsibilities of Armament Weapons Support Equipment (AWSE) were assigned to the Aircraft Intermediate Maintenance Department (AIMD). In 1986, intermediate maintenance responsibilities were transferred from the AIMD to the Weapons Department under the Armament Weapons Support Equipment Program (AWSEP). AWSEP implements Office of the Chief of Naval Operations policies for the allowance, management, and maintenance of conventional AWSE. Office of the Chief of Naval Operations Instruction (OPNAVINST) 4790.2E revised this program by removing the “Program” status leaving the title as AWSE. This change included the United States Marine Corps (USMC) as part of the AWSE effort, as they were exempt from the AWSEP program when implemented. AWSE is assigned to the AIMD and Marine Aviation Logistics Squadron (MALS) as custodian, and is issued to the Weapons Department under long-term sub-custody, along with the maintenance responsibilities. The custodian AIMD/ MALS assumes maintenance actions that are beyond the capability of the Weapons Department. AWSE is in the Operations and Support phase of the Defense Acquisition System.

Maintenance associated with AWSE is performed at the three levels of maintenance as prescribed by the Naval Ordnance Maintenance Management Program OPNAVINST 8000.16B (released 22 September 2003) and the Naval Aviation Maintenance Program, OPNAVINST 4790.2H. The maintenance management of AWSE is an intermediate level function within the Weapons Department and MALS. Maintenance management of AWSE is within the capability of the Aviation Ordnanceman (AO) rating and existing Navy Enlisted Classifications (NECs). USMC personnel holding Military Occupational Specialty (MOS) 6541 perform AWSE functions at the MALS.

The training track for AWSE maintenance management has been changed. Training Track, D/E-646-7100, is currently in use and has been modified by the model manager to intensify ordnance-related data. This training track modification includes a course specifically designed for Navy AO personnel for the maintenance management of weapons support equipment. This modification changed the current training track length from 3.4 weeks to 2.4 weeks. Upon successful completion of this track, students are awarded NEC 6810. Training track D/E-646-7100 has never included USMC personnel, despite the requirement for MALS to establish and run the AWSE Work Center 731. USMC personnel with MOS 6541 receive their AWSE maintenance management training through On-the-Job Training (OJT).

ARMAMENT WEAPONS SUPPORT EQUIPMENT

PREFACE

This Proposed Navy Training System Plan (NTSP) is an update to the Armament Weapons Support Equipment Program Proposed NTSP, N88-NTSP-A-50-8604B/P, dated September 2003. It has been developed by the Naval Air Systems Command (NAVAIR), in accordance with OPNAVINST 1500.76, to identify Manpower, Personnel, and Training requirements associated with the maintenance management of Armament Weapons Support Equipment (AWSE).

All fleet comments have been incorporated along with the major changes and updates listed below:

- PART I** This part deletes outdated information, incorporates changes to formal training, including a new course in the AWSE maintenance manager training track and a new Navy Enlisted Classification (NEC) 6811 awarding training track for AWSE Technicians.
- PART II** This part has been recalculated to depict current billet requirements of fleet support units through Fiscal Year (FY) 06.
- PART III** In addition to reflecting the changes mentioned above, this part has been recalculated to depict chargeable student billets through FY06.
- PART IV** This part has been updated to include support materials and training equipment required for the AWSE maintenance manager-training track and AWSE technician training track.
- PART V** This part has been updated to include major milestones.
- PART VI** No changes have been made.
- PART VII** This part has been updated to reflect current Points of Contact.

PART I - TECHNICAL PROGRAM DATA

A. TITLE-NOMENCLATURE-PROGRAM

1. **Nomenclature-Title-Acronym.** Armament Weapons Support Equipment (AWSE)
2. **Program Element.** Not Applicable (NA)

B. SECURITY CLASSIFICATION

1. **System Characteristics** Unclassified
2. **Capabilities** Unclassified
3. **Functions** Unclassified

C. MANPOWER, PERSONNEL, AND TRAINING PRINCIPALS

OPNAV Principal Official (OPO) Program Sponsor CNO (N781C8)

OPO Resource Sponsor..... CNO (N781C8)

Developing Agency NAVAIR (PMA260)

Training Agency CNATT (N5 FID)

Training Support Agency..... NAVAIR (PMA205)

Manpower and Personnel Mission Sponsor..... CNO (N12)

Director of Naval Education and Training CNO (N00T)

Chief of Naval Personnel..... NAVPERSCOM
(PERS-4, PERS-40)

Marine Corps Force Structure..... MCCDC (C53)

D. SYSTEM DESCRIPTION

1. **Operational Uses.** AWSE is identified by three functional areas: Armament Support Equipment (ASE), Logistics Support Equipment (LSE), and Weapons Support Equipment (WSE). AWSE is used to support aircraft installed armament systems and is used primarily by organizational or intermediate level maintenance activities. AWSE also includes specialized devices used to provide direct support to the aircraft or launch platform, such as bomb hoists, linkless ammunition loading systems, and weapons loaders. It also includes all equipment whose

primary function is support of the explosive ordnance component or weapon. WSE is used by Organizational, Intermediate, and Depot level maintenance activities, to provide direct support to the weapon community, examples of WSE include hoisting beams, handlift trucks, skids, trailers, adapters, and weapons assembly tables.

2. Foreign Military Sales. NA

E. DEVELOPMENTAL TEST AND OPERATIONAL TEST

1. Developmental Test and Operational Test Not Completed. New AWSE components are developed as required, normally with the introduction of new weapons. Developmental Tests (DT) and Operational Tests (OT) are performed by, naval civilian personnel at Lakehurst New Jersey, Point Mugu, California, and Patuxent River Maryland. There is little or no impact on naval manpower or personnel associated with the introduction of newly developed AWSE. Training associated with the introduction of new AWSE is rolled into existing courses of instruction and will have minimal impact on training personnel requirements. Large items of AWSE such as munitions loaders etc. are looked at for the requirement to have their own NTSP and if deemed a requirement the NTSP will address MPT issues associated with the new development. DT and OT will be required as an ongoing process with the introduction of new equipment. This NTSP is for a program and not a system, and therefore consists of many individual components.

2. Developmental Test and Operational Test Completed. DT and OT testing has been completed on all fielded AWSE. Fleet operational investigations for the Armament Weapons Support Equipment Program (AWSEP) were successfully conducted from February 1980 to March 1983 at the following locations:

- United States Ship (USS) John F. Kennedy Aircraft Carrier (CV-67)
- Naval Air Station (NAS) Oceana, Virginia
- USS Constellation (CV-64)
- NAS Miramar, California
- Headquarters and Maintenance Squadron 14, Cherry Point, North Carolina
- NAS Moffett Field, California
- Naval Aviation Weapons Facility Saint Mawgan, United Kingdom

F. AIRCRAFT AND/OR EQUIPMENT/SYSTEM/SUBSYSTEM REPLACED. The replacement and upgrading of weapons is an ongoing effort. There has been a significant change in the maintenance management philosophy associated with the AWSEP. Maintenance and Maintenance management functions have been switched from Aircraft Intermediate Maintenance Departments (AIMD) to Weapons Departments, afloat and ashore.

G. DESCRIPTION OF NEW DEVELOPMENT

1. Functional Description. AWSE is the equipment required supporting an operational unit's, weapons missions. AWSE is broken down into categories based on the functional area of support provided. These areas are ASE, WSE, and LSE.

ASE is provided to squadrons and intermediate level maintenance units based on their Individual Material Readiness List (IMRL). Examples include bomb hoists, linkless ammunition loading systems, weapons loaders etc.

WSE includes all equipment whose primary function is support of the explosive weapons or components. It is used by organizational, intermediate and depot level activities. Examples include hoisting beams, hand-lift trucks, skids, trailers, maintenance stands, and bomb assembly tables.

LSE includes equipment used for Packaging, Handling, Shipping, and Transportation (PHS&T) of weapons and weapon components. Examples include weapons packaging equipment, ship loading or underway replenishment equipment, and industrial handling equipment.

2. Physical Description. The numbers of different aircraft, multiple configurations, and unique requirements preclude listing all applicable authorized handling equipment. However the following reference manuals provide a listing of specific items of handling equipment along with a description of each item, the command having cognizance for each item, the in service engineering agent, and applicable authorized technical manuals for each individual item.

- NAVAIR 11-120A1.1 (Volume 1) Airborne Weapons Packaging/Handling/Stowage (Shipboard)
- NAVAIR 11-120A-1.2 (Volume 2) Airborne Weapons Packaging/Handling/Stowage (Shipboard)
- NAVAIR 11-140-24 Airborne Weapons Support Equipment
- NAVAIR 11-140-25 Armament Handling Equipment Configuration Manual, All Aircraft
- NAVAIR 19-100-3 Armament Weapons Support Equipment Miscellaneous adapters, Intermediate level Maintenance with Illustrated Parts Breakdown.

3. New Development Introduction. The AWSE program was introduced to fleet activities incrementally by site, with full implementation of the program completed in 1988, and that no new developments are currently under development with AWSE program.

4. Significant Interfaces. NA

5. New Features, Configurations, or Material. NA

H. CONCEPTS

1. Operational Concept. AWSE maintenance functions are assigned, controlled, maintained, and documented by Navy Intermediate Maintenance Activities, (Weapons Departments and AIMDs). In the United States Marine Corps (USMC) this function is assigned to the Marine Aviation Logistics Squadron (MALS). The controlling document that identifies the department responsible for AWSE maintenance is the AIMD IMRL, which is generated from the Support Equipment Resource Management Information System (SERMIS). The Armament Section of the AIMD IMRL identifies the Weapons Department's Support Equipment (SE) requirements and maintenance level responsibility, and provides identification, inventory, and maintenance management information. A Local Asset Management System (LAMS) List 04 report is generated by the Main IMRL division when IMRL items are sub-custody to individual work centers. The LAMS 04 list reports those IMRL items that are under long-term sub-custody to the Weapons Department. A more in depth discussion on the various facets of WSE Allowancing, Support Equipment Resources Information Management System, IMRL, IMRL Transaction Reporting, and Support Equipment Controlling Authorities (SECA) can be found in the Naval Ordnance Maintenance Management Program (NOMMP) Volume II Chapter 8.1.

2. Maintenance Concept. Responsibility for AWSE and associated maintenance functions resides with the Weapons Department and MALS, with support from the AIMD.

AWSE maintenance responsibilities and procedures affect the AIMDs (AWSE Custodian) and the Weapons Departments (AWSE sub-custodian), on naval air stations, aircraft carriers, and amphibious assault ships. It is intended that each maintenance task be performed at that level of maintenance, which will ensure the best use of materials, manpower, and funding. On-equipment, maintenance will be performed by the sub-custodian. AWSE maintenance beyond the capability of the, Weapons Department will be accomplished by the AIMD.

Maintenance of AWSE is accomplished using guidelines outlined in OPNAVINST 4790.2H, and specific AWSE maintenance instructions outlined in OPNAVINST 8000.16B. The Weapons Department AWSE work center will normally perform the bulk of the AWSE maintenance. The AIMD is responsible for performing maintenance sub-custodied to the embarked air-wing. Because of this, there may be in some cases, a duplication of maintenance tasks performed by these two departments.

A new NEC 6811 has been approved by OPNAV for identifying AWSE maintenance technicians. USMC AWSE personnel will remain Military Occupational Specialty (MOS) 6541.

a. Organizational. Organizational level maintenance activities perform preventive and corrective maintenance actions necessary to maintain AWSE to design levels of performance, reliability, and material condition. As their responsibility organizational level

maintenance activities perform daily and pre-operational inspections, and corrosion prevention cleaning, and minor treatment procedures.

b. Intermediate. Intermediate level maintenance activities perform preventive and corrective maintenance actions, which are beyond the capability of the organizational level maintenance activity. Weapons Department personnel with NEC 6810 manage the following intermediate level maintenance functions.

- Requisition, receipt, storage, delivery, and issuance of AWSE to user activities within the Weapons Divisions
- On-equipment corrective and preventive maintenance
- Minor corrosion control
- Storing, handling, and shipping
- Compliance with Technical Directives and Engineering Change Proposals
- Ready service inspection
- Discrepancy reporting
- Record keeping and reporting

c. Advanced Intermediate Level Maintenance. Intermediate level maintenance actions that are beyond the capability of the Weapons Department are considered advanced intermediate level tasks and are assumed by the custodial AIMD. Advanced intermediate level maintenance includes:

- Off-equipment repair
- Specific component repair
- Major corrosion control
- Weight capacity certification
- Compliance with Technical Directives and Engineering Change Proposals beyond the capability of the Weapons Department

d. Depot. Maintenance that is beyond the capability of the AIMD is designated as depot level maintenance. Depot level maintenance functions are carried out at industrial establishments having more extensive facilities, skills, and materials than fleet and field activities. Depot level activities may be government-owned and operated, government-owned and contractor operated, or contractor-owned and operated. Depot level activities are authorized to perform all repair, replacement, modification, and overhaul actions prescribed by the applicable equipment maintenance plans, technical manuals, and technical directives approved and issued by NAVAIRSYSCOM.

e. Interim Maintenance. NA

f. Life Cycle Maintenance Plan. NA

3. Manning Concept. The intermediate level maintenance workload and administrative support requirements of each Weapons Department drive AWSE manning. Maintenance management of AWSE is within the capability of existing NECs 6810. A new NEC (6811) has been approved. It has been established to identify AWSE Technicians. The new NEC will not increase current manpower requirements. It will however require converting some current 0000 NEC billets to the new AWSE Technician 6811 NEC.

4. Training Concept. The purpose of AWSE training is to provide qualified maintenance managers and technicians. To facilitate this, Armament Weapons Support Equipment Maintenance Manager Course, Course Identification Number (CIN) C-646-3108 of training track D/E-646-7100 was revised and is being provided to personnel in the Aviation Ordnanceman (AO) rating. Also a new course of instruction, Armament Weapons Support Equipment Maintenance Technician course CIN C-646-3109 of training track D/E-646-7008, has been developed to provide AO personnel, training in the processes and procedures required to maintain and repair AWSE

Training track D/E-646-7100, and D/E-646-7008 are currently provided by Maintenance Training Unit (MTU) 4033, Naval Air Maintenance Training Unit (NAMTRAU) North Island, California, and MTU 4032, NAMTRAU Norfolk, Virginia. Aviation Support Equipment Maintenance Managers course, C-500-3202, has been deleted and training track D/E-646-7100 currently consists of the Command Indoctrination Course, C-600-3601, and Armament Weapons Support Equipment Maintenance Manager Course, C-646-3108. Total track length is 16 days.

USMC personnel with MOS 6541 receive their AWSE maintenance management training through On-the-Job Training (OJT).

The established training concept for most aviation maintenance training divides “A” School courses into two or more segments called Core and Strand. “A” School Core courses include general knowledge and skills training for the particular rating, while “A” School Strand courses focus on the more specialized training requirements for that rating and a specific aircraft or equipment, based on the student’s fleet activity destination. Strand training immediately follows Core training and is part of the “A” School.

a. Initial Training. Initial AWSE training has been completed. If future initial AWSE training is required, due to new weapons and AWSE development, it will be included in updates to this NTSP.

b. Follow-on Training

(1) Operator Training. AWSE Operators get training through OJT.

(2) Maintenance Training

Title **Armament Weapons Support Equipment Maintenance Manager Course**

CIN D/E 646-7100

Model Manager ... MTU 4033 NAMTRAU North Island

Description This track provides training to ordnance personnel assigned as AWSE managers and includes:

- IMRL
- Equipment Accounting Procedures including: Requisition, Receipt, Storage, delivery, and issuance of AWSE to User Activities.
- Maintenance Manuals
- Technical Directive and Engineering Change Proposal Compliance
- Safety Procedures

Upon completion, the student will have the knowledge required to perform as an AWSE manager under limited supervision.

Location ◦ MTU 4032 NAMTRAU Norfolk
◦ MTU 4033 NAMTRAU North Island

Length 16 days

RFT date Currently available

Skill identifier AO NEC 6810

TTE/TD None

Prerequisite C-602-2011, Aviation Ordnanceman Class A1
C-646-2012, Aviation Ordnanceman Navy Difference Training
D/E 646-7008, Armament Weapons Support Technician.

Title **Armament Weapons Support Equipment Technician Course**

CIN D/E 646-7008

Model Manager ... MTU 4032 NAMTRAU Norfolk

Description This track provides training to ordnance personnel and includes:

- Ready Service Inspection
- Troubleshooting Procedures
- Equipment Repair Procedures
- Maintenance Manuals
- Discrepancy Reporting
- Safety Procedures

Upon completion, the student will have the knowledge required to perform maintenance in AWSE in a shop environment under limited supervision.

Location ◦ MTU 4032 NAMTRAU Norfolk
 ◦ MTU 4033 NAMTRAU North Island

Length 16 days

RFT date Currently available

Skill identifier AO NEC 6811

TTE/TD None

Prerequisite C-602-2011, Aviation Ordnanceman Class A1
 C-646-2012, Aviation Ordnanceman Navy Difference Training

c. Student Profiles

SKILL IDENTIFIER	PREREQUISITE SKILL AND KNOWLEDGE REQUIREMENTS
AO 6810	C-646-2011, Aviation Ordnanceman Class A1 C-646-2012, Aviation Ordnanceman Navy Difference Training D/E 646-7008, Armament Weapons Support Technician.
AO 6811	C-646-2011, Aviation Ordnanceman Class A1 C-646-2012, Aviation Ordnanceman Navy Difference Training

d. Training Pipelines. All changes required to support management and maintenance of AWSE have been made and training is currently available.

I. ON-BOARD (IN-SERVICE) TRAINING

1. Proficiency or Other Training Organic to the New Development

a. Maintenance Training Improvement Program. Current planning is to adopt the Aviation Maintenance Training Continuum System (AMTCS) concepts to replace Maintenance Training Improvement Program (MTIP). AMTCS is scheduled to begin full implementation for fleet deployment in FY 02.

b. Aviation Maintenance Training Continuum System. AMTCS will provide career path training to the Sailor or Marine from their initial service entry to the end of their military career. AMTCS concepts will provide an integrated system that will satisfy the training and administrative requirements of both the individual and the organization. The benefits will be manifested in the increased effectiveness of the technicians and the increased efficiencies of the management of the training business process. Where appropriate, capitalizing on technological advances and integrating systems and processes can provide the right amount of training at the right time, thus meeting the Chief of Naval Operations' (CNO) mandated "just-in-time" training approach.

Technology investments enable the development of several state-of-the-art training and administrative tools: Interactive Multimedia Instruction (IMI) for the technicians in the Fleet in the form of Interactive Courseware (ICW) with Computer Managed Instruction (CMI) and Computer Aided Instruction (CAI) for the schoolhouse.

Included in the AMTCS development effort is the Aviation Maintenance Training Continuum System - Software Module, which provides testing [Test and Evaluation], recording [Electronic Certification Qualification Records], and a Feedback system. The core functionality of these AMTCS tools are based and designed around the actual maintenance-related tasks the technicians perform, and the tasks are stored and maintained in a Master Task List data bank. These tools are procured and fielded with appropriate Commercial-Off-The-Shelf (COTS) hardware and software, i.e., Fleet Training Devices - Laptops, PCs, Electronic Classrooms, Learning Resource Centers (LRC), operating software, and network software and hardware.

Upon receipt of direction from OPNAV (N789H), AMTCS concepts are to be implemented and the new tools integrated into the daily training environment of all participating, aviation activities and supporting elements. AMTCS will serve as the standard training system for aviation maintenance training within the Navy and Marine Corps, and is planned to supersede the existing MTIP and Maintenance Training Management and Evaluation Program (MATMEP) programs.

2. Personnel Qualification Standards. No Personnel Qualification Standards exist for AWSE, at this time.

3. Other On-Board (In-service) Training Packages. Personnel involved with the maintenance of AWSE whose duties involve handling explosive ordnance must be trained, qualified and certified to perform these actions in accordance with the requirements of Maintenance Requirements Cards (MRC) OPNAVINST 8020.14/Marine Corps order P8020.11 and applicable type commander instructions.

J. LOGISTICS SUPPORT

1. Manufacturer and Contract Numbers. NA

2. Program Documentation. Detailed AWSE procedures and guidance are published in the following documents which are dedicated to the various elements of the program.

NUMBER	TITLE	DATE
OPNAVINST 4790.2H	Naval Aviation Maintenance Program	Jun 01
OPNAVINST 4790.4C	Ships Maintenance Material Management (3M) Manual	Nov 94
OPNAVINST 8000.16B	Naval Ordnance Maintenance Management Program	Sep 03
N/A 11-140-24	Technical Manual, Airborne Weapons Support Equipment	Sep 90
Commander Naval Air Forces Atlantic Fleet (COMNAVAIRLANTINST) 13650.1E	Individual Material Readiness Program	Nov 94

3. Technical Data Plan. Navy technical publications to support AWSE consist of maintenance manuals and maintenance requirement cards, varied by site depending on equipment to be maintained. Once the equipment to be supported is identified, technical publications are requested through AIMD from the Naval Air Technical Data and Engineering Service Command (NATEC), San Diego, California.

4. Test Sets, Tools, and Test Equipment. NA

5. Repair Parts. NA

6. Human Systems Integration. AWSE is a mature program. All new design systems and software should address the human-machine interface for operators, maintainers, and support personnel. The design processes should conform to best standard human engineering practices as defined in existing human factors engineering design standards. This system has no habitability impact. Manpower issues are covered in part II and III of this document. Maintenance training includes a blend of paper-based instruction with practical job training. All future ICW and CBT must be Sharable Content Object Reference Model (SCORM) conformant as per Executive Order 13111 and conform with the technical standards to run in the intended environment: classroom automated electronic classroom or learning resource center, Navy e-learning, AMTCS, or desktop (NMCI ashore or IT21 afloat).

The ECP process, in accordance with NAVAIRINST 4130.1C, is utilized to initiate upgrades to operational and training systems and allows for inputs to the affect on the human and MPT. All new engineering change proposals for AWSE take into consideration the human-machine interface for Operators, Maintainers, and Support Personnel.

The Naval Education and Training Command (NETC) (via Chief of Naval Education and Training (CNET) Instruction 1500.30) established policy, procedures, and responsibility for the administration and operation of the NETC training feedback program. This program provides a web-based homepage template containing a training feedback form icon. Each school is to develop a form following this format with a link back to the NETC homepage at <https://www.cnet.navy.mil/>. This web page form is used to receive feedback on any training issue, training concern, or to make general recommendations. A Fleet partnership program will also be established to develop a close relationship with representative samples of customers to evaluate the quality of the trained graduates and the relevance of skills trained. In conjunction with this Fleet feedback program, a Human Performance Requirements Review (HPRR) process is required by OPNAV Instruction 1500.69A. HPRRs provide a process for resource and program sponsors to identify and correct training deficiencies. A training effectiveness evaluation has not been performed but the courses have undergone a yearly formal course evaluation since inception. The results from these formal course reviews are used to effect curriculum changes to meet the fleet's needs. A formal training effectiveness evaluation action chit has been documented in Part VI of this NTSP listing the Assistant Program Manager Training System, NAVAIR PMA205 as the action command.

In its current state of design, AWSE contains no explosive, radioactive, or carcinogenic materials. Toxic materials are present in small amounts and in forms that present no hazard during any phase of system ownership, including disposal. If the components were to be incinerated, limited amounts of corrosive vapors would be generated by the decomposition of wire insulation. This is common to all electronic equipment meeting the requirements to operate in the specified environments. Environmental and Occupational Safety and Health requirements meet federal, state, and local standards, regulations, and directives and are enforced by respective agencies, as applicable.

K. SCHEDULES. Implementation of AWSEP was completed in 1988. As new activities stand up, AWSE maintenance is automatically implemented.

L. GOVERNMENT FURNISHED EQUIPMENT AND CONTRACTOR FURNISHED EQUIPMENT TRAINING REQUIREMENTS. NA

M. RELATED NTSPs AND OTHER APPLICABLE DOCUMENTS

DOCUMENT OR NTSP TITLE	DOCUMENT OR NTSP NUMBER	PDA CODE	STATUS

PART III - TRAINING REQUIREMENTS

The following elements are not affected by the AWSE program and, therefore, are not included in Part III of this NTSP:

III.A.1. Initial Training Requirements

III.A.2. Follow-on Training

III.A.2.b. Planned Courses

III.A.2.c. Unique Courses

III.A.3. Existing Training Phased Out

Note: All 6811 billets identified in this NTSP are preliminary and have been derived from inputs received from COMNAVAIRLANT/COMNAVAIRPAC. All student through puts are based on theses numbers

PART IV - TRAINING LOGISTICS SUPPORT REQUIREMENTS

The following elements are not affected by the AWSE Program and, therefore, are not included in Part IV of this NTSP:

IV.A. Training Hardware

IV.A.2. Training Devices

IV.B. Courseware Requirements

IV.B.1. Training Services

IV.C. Facility Requirements

IV.C.1. Facility Requirements Summary (Space/Support) by Activity

IV.C.2. Facility Requirements Detailed by Activity and Course

IV.C.3. Facility Project Summary by Program

PART IV - TRAINING LOGISTICS SUPPORT REQUIREMENTS

IV.A. TRAINING HARDWARE

IV.A.1. TTE / GPTE / SPTE / ST / GPETE / SPETE

CIN, COURSE TITLE: C-646-3109, Armament Weapon Support Equipment Technician (Track D-646-7008)

TRAINING ACTIVITY: MTU 4033

LOCATION, UIC: NAMTRAU North Island, 66065
